MEMORANDUM FOR: [ ]

SUBJECT : Duties as Acting TCO in my absence

1. Billet approvals: This is routine. Claire will place the paper in front of you for you to sign. You need not check with Thomas if the paper seems in good order. She will do that. I would expect almost all cases to be approved, but between your own judgment, Claire's and Thomas's, I'm sure you will spot any irregularities.

*Unknown*  
*Code 7*  
2. Middle East Requirements: Bernie has the basic list. The ARC has not recommended coverage. If, however, on higher authority Middle East coverage is instituted by the Project, Operations normally informs this office and the areas to be covered, whereupon Bernie should be requested to check with Army, Navy, Air, and OCI (not ORR or OSI) so that they may phone in to her by code their requirements. She then forwards these to Operations and to HTAUTOMAT promptly, others as soon as feasible.

3. USSR: Target materials in this regard are, of course, in good shape, having just been revised. As you will note from examination, the narrative is in effect a justification for why penetration is necessary. Whereas I do not expect problems in this area in my absence, it could be that a situation would arise in which preparation of special materials (almost certainly to be drawn from this document) would be required. In that instance, you should get the instruction clear, call together the ARC representatives, and do the best you can.

4.

*Operations have ceased.*  
The ARC has had little interest in this. On such

flights as have been occurring have been at the instance of DD/P or CINCPAC. I am going to examine whether, before going, a basic list should be compiled for ready reference in telephonic communication in an emergency.
